

ABSTRACT

Innovation of “Brinjaloo” at IUBAT through Grafting Brinjal on Potato.

ABSTRACT

Vegetables are important for human health but, day by day population is increase & land decrease to meet our vegetable demand we innovation “Brinjaloo” plants. The innovation of “Brinjaloo” plants minimized the land & maximum production & less cost high production. The grafting was successful 93.2%, then maximum plant height 97cm, number of leaf's85, number of branches 14, number of flowers 26, number of fruits 16 average, average length 8.2cm average diameter 7.6cm & average weight 88.6 gm& potato number of fruits 23, then average length of potato 56.2 cm diameter 39.8cm & average weight 49gm.
